Dear Sir or Madame:

Re: Ground Water Permit No. G 2-27693

In response to your request, a one year extension is being granted to enable you to complete the construction of your project covered under the above referenced numbers

These extensions are effective from January 1, 1993, through January 1, 1994. Enclosed is a Notice of Completion of Construction form which must be filed on or before January 1, 1994, or you must contact this office.

Under the provisions of Chapter 43.21B RCW, this is an appealable decision. Any person wishing to submit an appeal may contact this office for procedures.

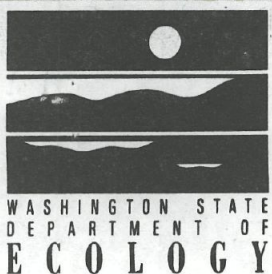

Sincerely,

A handwritten signature in cursive script that reads "Gale Blomstrom".

RE: Bonney Lake Tacoma Point Well - MS 700

Dear Ms. Van Hulle:

I am writing in reference to the letter dated November 30, 1995, which we sent you regarding to the City of Auburn's concerns with the City of Bonney Lake Tacoma Point Wells.

Subsequent to transmitting the letter cited above, we determined that we incorrectly stated that the Tacoma Point Wellfield was put on line in the late 1970's (i.e. 1976), concurrent with a significant flow reduction affecting our Coal Creek Spring source. Apparently, the Tacoma Point Wells were put on line in 1986, rather than 1976. While I regret the error in the earlier letter, I would like to reaffirm the City of Auburn's deep concern regarding the potential impact of the Tacoma Point Wellfield on Auburn's existing, senior water rights, and our resolution to protect these rights.

The City is conducting a hydrogeologic study to address the potential impairment of Coal Creek springs, and to the extent possible, we intend to work with Bonney Lake to resolve any issues that will arise from the study. Under any circumstance, it is probable that we will have further contact with you before this issue comes to a resolution.

If you have any questions or issues that you would like to discuss regarding this matter, please contact me at 804-5062.

Sincerely,

Dwight L. Holobaugh, PE
Utilities Engineer

WATER RESOURCES
DEPARTMENT OF ECOLOGY
SOUTHWEST REGIONAL OFFICE
P O BOX 4775
OLYMPIA WA 98504 7775

Dear Ms. Van Hulle:

I am writing to inform you of our belief that the City of Bonney Lake's Point Tacoma well operations are impairing the City of Auburn's Coal Creek Springs (CCS) water right. CCS is Auburn's largest single, certificated supply source and has a priority date of 1925.

Auburn's belief that Bonney Lake is impairing CCS is based on several factors, but most notably, a set of pumping flow records for Coal Creek Springs from the 1970's. These records demonstrate that almost immediately after the Tacoma Point wells were put on line in 1977, CCS experienced an immediate and significant decrease in flow. Auburn officials at the time detected the flow decrease, but were advised by the City's former engineering consultant that the decrease was probably caused by clogs in the CCS collector system. No investigation was made at that time (late 70's/early 80's) to determine if new water rights had been issued by Ecology in hydraulic proximity to the CCS source.

Our finding of impairment, in addition to the data described above, came about during a recently completed operational review of the CCS source and water right. This review was triggered in large part by the Lakeland Company/Bonney Lake applications for new and supplemental rights in the Lakeland Hills area. Pursuant to this review, Auburn requested Pacific Ground Water Group (PGG), our current hydrogeology firm, to analyze the potential for hydraulic continuity between Lakeland Hills and our CCS source. Not only did PGG determine that there was a high potential for continuity between the Lakeland Hills Applications and Auburn Wells 5, 5A, and CCS, they found similar continuity potential with other Bonney Lake sources, including the Tacoma Point wellfield.

Given the PGG findings, we engaged in further investigation which revealed that the Tacoma Point wells were put on line at the same time our records first determined flow decrease in CCS. Subsequent site investigations of our CCS facilities have detected no collection system/piping problems that would account for the decreased production.

S

S

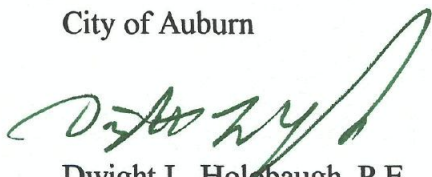

Ms. Jill Van Hulle
November 30, 1995
Page 2 of 2

Because of CCS's role as Auburn's largest single source, in addition to its potential future role as a Muckleshoot Tribe hatchery source, Bonney Lake's impairment of the CCS right is a subject of serious concern for the City. Our concerns, however, does not end with the impairment that has already occurred. Within recent weeks it has come to our attention that Bonney Lake intends to increase its present production from the Tacoma Point Wells to meet developer requests. If such an increase occurs, we believe that the present CCS flow decrease will be further exacerbated. This is simply not acceptable to the City. Thus, we are prepared to take all appropriate regulatory and legal action to prevent this impact. We are notifying you now of that intent, but also formally requesting your assistance in protecting Auburn's senior right from any further impairment.

In closing, let me state that we have made efforts to discuss this matter with the City of Bonney Lake. We have recently had an opportunity to personally meet with Mr. Bruce Gould, the Director of Public Works, and advise him clearly on our position. It is our intention to continue to attempt to resolve the issues with Bonney Lake, but should these efforts prove unsuccessful, Auburn is prepared to vigorously protect its interest.

Sincerely,

City of Auburn

Jolene Gosselin, City Engineer
City of Bonney Lake
P.O. Box 7380
Bonney Lake, WA 98390-7380

Dear Ms. Gosselin:

Re: Water Right Permit G2-27693 - Tacoma Point Well No. 4

Recently we talked to discuss final certification of the above referenced water right permit, at that time I advised you to submit the certification fees, with the *Proof of Appropriation form*. Since our conversation, the program has re-examined its procedure concerning certificate issuance, especially as relates to timing.

For your information, effective immediately the Department of Ecology, Water Resources Program will not proceed to issue Water Right Certificates for any public water supply permits where the water has not been put to full beneficial use.

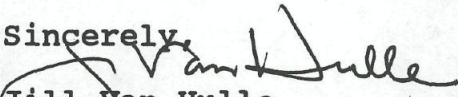

This affects your permit because it is our understanding that Bonney Lake's water system is still many years away from full build-out. Please find enclosed the *Proof of Appropriation form* that you recently submitted to the Department of Ecology. We are also returning the \$8.00 check made payable to the Pierce County Auditor. Your check for \$5.00 made payable to the Department of Ecology will be refunded to you separately.

The final certificate will be issued only when the right has been completely "perfected", and you can demonstrate by meter readings and use data that the quantity of water allocated by the permit has been put to full beneficial use.

This permit is in good standing until January 1, 2010. If at that time the City is unable to put the water to full beneficial use, you may request an additional extension.

We apologize for the confusion, feel free to contact me at (206) 407-0274 if you have questions or concerns.

Sincerely,

Jill Van Hulle

Dear Sir or Madame:

Re: Ground Water Permit No. G 2-27693

We have received your Notice of Completion of Construction in connection with the above referenced permit.

Enclosed is a Proof of Appropriation form which is to be filed when the water has actually been put to full beneficial use. If you cannot put the water to full beneficial use by, January 1, 1995, you must contact this office.

The fees for filing and recording your final certificate of water right are: (Cash will NOT be accepted)

\$5.00 payable to the Department of Ecology

\$8.00 payable to the Pierce County Auditor

Please send two remittances and the completed Proof of Appropriation form (with notarized signature) to this office.

Sincerely,

A handwritten signature in cursive script that reads "Sheri Fox".

RE: Ground Water Permit No. G-2-27693

Dear Gale:

We have addressed and implemented recommendations to acquire water rights for ground water permit no. G-2-27693 (our TP well no.4) as written in the Report of Examination, dated January 30, 1990.

The following recommendation by Department of Ecology have been implemented:

We completed and submitted a Water Conservation Plan for the City of Bonney Lake to the Department of Health. Attached is a copy, for your records, granting approval from the Department of Health for our Water Conservation Plan.

In our TP well no.4, we have installed and maintain an access port (6 in.) along with an air line and direct read gauge as described in Ground Water Bulletin No. 1.

We have installed a master meter measuring device. This is an approved impeller driven gage by Water Specialists.

We are looking forward to the completion of this project and granting of the water rights. If you have any question regarding this matter please contact me at (206)862-8602.

Very Truly Yours,

Jolene Gosselin

Re: City of Bonney Lake
Well #4

The City has completed construction of the well and installation of a pump in this facility.

The recommendations in the report of examination dated August 13, 1991 requires the City to develop a water conservation plan. This plan is currently being prepared by Gray & Osborne, the City's consulting engineers.

This plan should be completed and submitted to D.O.E. by June 15, 1993.

The City will at that time be prepared to finalize this project.

Please contact me at (206) 862-8602, if I can be of any assistance.

Dear Sir or Madame:

Re: Ground Water Permit No. G 2-27693

In reviewing your permit, we find you have not submitted a completion of construction form.

If the work has been completed on this project, please complete the enclosed form. If not, you must request an extension of one year. Please submit the statutory extension fee of \$5.00, payable to the Department of Ecology.

By statute, projects under permit must be pursued with diligence, and good cause for granting an extension must be shown. A report of progress made during the past year must be included with your request for extension.

If you do not submit the enclosed form or show sufficient cause for an extension within sixty (60) days from receipt of this letter, an order of cancellation will be issued.

Sincerely,

Sheri Fox
